

EcoTech Fuels, LLC

Converting Trash, Industrial & Bio-Wastes Into Clean Energy & High Cetane Diesel

Waste to Fuel Plant

## DAILY PRODUCTION

**Solid Waste Intake**

**1,000 Tons**

**Bio-Diesel  
(Torqazine-D)**

**2,200 Barrels**

## ADVANTAGES

- + Greatly reduced manufacturing costs
- + More oxygen, additional BTU's
- + Less evaporative emissions
- + Delivers more miles per gallon
- + Better engine cleaning performance
- + Up to 69% lower VOC's and particulate emissions than the next cleanest burning reformulated diesel

## UTILIZED FOR

- ✓ Local Community: supply competitively priced clean diesel fuel to municipal and local vehicles, such as buses and garbage trucks.
- ✓ Governmental use: Army, Coast Guard, Police, Fire Brigade, etc.
- ✓ Power Source: supply power-generators on small islands (where conventional power supply is unavailable)
- ✓ Coastal & inter-island shipping
- ✓ Diesel operated railway-engines
